Dear Panelist,

This survey is about public preferences for nature and water quality and is part of a research project involving Danish and international universities.

The survey takes approximately 20 minutes to complete. There are no 'right' and 'wrong' answers. We would like to hear your personal opinion disregarding your level of knowledge and interest in nature, outdoor recreation and the aquatic environment. For the purpose of the study it is very important that as many as possible completes the entire survey. All answers will be fully anonymous.

Do you want to participate in the survey?

Yes

No

FILTER 1: ONLY IF Q1=NO

ROUTING: IF Q1=NO, END QUESTIONNAIRE AFTER Q2

What is the reason for you not wanting to participate?

I don't have time at the moment.....

- I am not interested in being part of a research project.....
- 20 minutes is too long.....
- I don't want to participate when I don't know what the survey is about.....
- I am not interested in the participation payment.....

Please imagine a classic agricultural landscape in your region of residence. The environmental authorities are considering changing an area to another landscape type. The environmental authorities would like to know how the general public thinks of the project.

In the following 12 choices we will ask you to choose between three different landscape types. In each choice situation please consider whether you prefer the present agricultural landscape or whether you are willing to pay for the proposed landscape alternatives.

IF SPLIT 1=2

Landscape change

In each question the alternative landscapes will be different. The alternatives will vary among the following landscape types.

<p>Agricultural land</p>  <p>Area of arable land for traditional agricultural production</p>	<p>Forest (5 ha) App. 10 Soccer fields</p>  <p>Area with a majority of trees</p>	<p>Wetland (1 ha) App. 2 soccer fields</p>  <p>Area that is permanently or seasonally saturated with water</p>	<p>Energy willow (1 ha) App. 2 soccer fields</p>  <p>Area of tree production for energy purposes. Harvested every 1-4 years</p>
--	--	---	---

Access

The alternative landscape is either with public access or without public access.

Distance

The alternative landscape is placed either within 5 km from your residence or above 5 km from your residence.

<p>Within 5 km from your residence</p> 	<p>Beyond 5 km from your residence</p> 
---	---

Payment

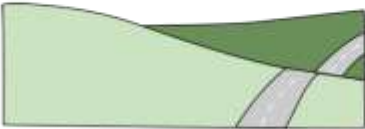

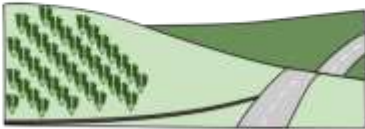

The payment for the change of the landscape is a yearly payment through your income tax. Note, that the payment will reduce your household consumption possibilities for other goods and services.

IF SPLIT 2=2

The ICS is randomly chosen among the 12 choice sets for each respondent

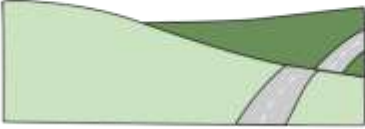

Below you find an example of a choice situation.

In the following 12 choice situations please consider whether you prefer the present situation of agricultural land without access and without a payment or whether you are willing to pay a given amount for either Alternative A or Alternative B in which you will get a landscape change with or without access and within or beyond a 5 km distance from your residence.

Present situation	Alternativ A	Alternativ B

RANDOMIZE ORDER OF Q14-Q16

Which of the following conditions in and around coastal waters is most important to you?

- The conditions in and around the aquatic environment must provide physical and mental well-being
- The conditions in and around coastal waters must ensure biodiversity conservation in terms of diversity of animal and plant species.
- The conditions in and around coastal waters must secure commercial fisheries.

Which of the following conditions in and around coastal waters is most important to you?

- The conditions in and around coastal waters must ensure industrial production in the area
 - The conditions in and around coastal waters must preserve livelihood and lifestyle in the area
 - The conditions in and around coastal waters must support nutrient recycling
-

Which of the following conditions in and around coastal waters is most important to you?

- The conditions in and around coastal waters must support recreational activities such as hiking, beach trips and picnicking
 - The conditions in and around coastal waters must ensure water based production of e.g. mussels.
 - The conditions in and around coastal waters must ensure good living conditions for animals and plants

Work is currently being done on how to improve the water quality in Danish streams, lakes and coastal waters. The environmental authorities would like to know how the public thinks about that.

In the following 12 choice situations regarding water quality please choose your preferred alternative among the three. Please consider whether you prefer the present situation or if you are willing to make an extra payment to improve the water quality as described in one of the two alternatives.

There will be no extra initiatives if you choose the present situation. The water quality will remain in the present 'poor' condition in the three areas*

Segment specific info*

IF ESS=reg then "and, the biological conditions will be equivalent".

IF ESS= pro then "and, commercial fishing possibilities will be equivalent".

IF ESS= cul then "and, recreation and lifestyle possibilities will be equivalent".

Policy area

The policy areas in this study are Limfjorden, Lillebælt og Øresund.

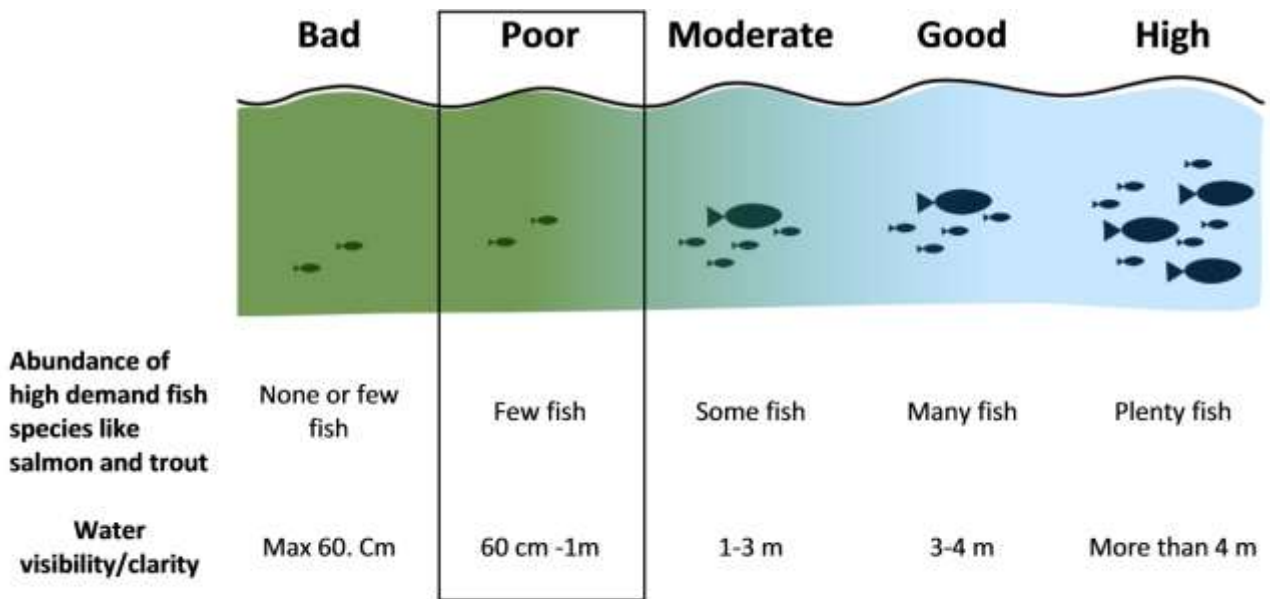

The water quality in these coastal waters is by biologists characterized as being in poor condition.

SPLIT1=1

Water quality

If you choose alternative A or B there will be an improvement of the water quality from the present 'Poor' condition. There are three levels of improvement; moderate, good or high.

The conditions on each level of water quality is given in the figure below.

IF SPLIT 1=1 AND SPLIT 3=2 AND ESS= REG

Biotic conditions

The water quality influences how we as a society and you as an individual benefit from the Danish coastal waters. The water quality ensures habitats for a wide array of animal and plant species and is part of sustaining a diverse genetic variation within species. Furthermore, the conditions in and around coastal waters sustain nutrient cycling.

Payment

The payment for the water quality improvement is a yearly payment through your income tax. Note, that the payment will reduce your household consumption possibilities for other goods and services.

Choice

Please consider each choice carefully and choose your preferred alternative based on the policy area, the water quality, the biotic conditions and the payment.

Note that each of the 12 choices is a new situation, in which you shall not consider your previous choice.

IF SPLIT 1=1 AND SPLIT 3=2 AND ESS= PRO

Fishing industry conditions

The water quality influences how we as a society and you as an individual benefit from the Danish coastal waters. The water quality is vital for ensuring commercial fisheries as well as mussel production. An improvement of the water quality will lead to an improvement in the conditions in the fishing industry.

Payment

The payment for the water quality improvement is a yearly payment through your income tax. Note, that the payment will reduce your household consumption possibilities for other goods and services.

Choice

Please consider each choice carefully and choose your preferred alternative based on the policy area, the water quality, the conditions in the fishing industry and the payment.

Note that each of the 12 choices is a new situation, in which you shall not consider your previous choice.

IF SPLIT 1=1 AND SPLIT 3=2 AND ESS= CUL

Conditions for recreation and livelihood

The water quality influences how we as a society and you as an individual benefit from the Danish coastal waters. The water quality affects the benefits of recreational activities such as hiking, swimming, sailing and fishing. Thereby water quality is part of sustaining physical as well as psychological wellbeing and livelihood and lifestyle in the area.

Payment

The payment for the water quality improvement is a yearly payment through your income tax. Note, that the payment will reduce your household consumption possibilities for other goods and services.

Choice

Please consider each choice carefully and choose your preferred alternative based on the policy area, the water quality, the conditions recreation and livelihood and the payment.

Note that each of the 12 choices is a new situation, in which you shall not consider your previous choice.

IF SPLIT 3= 2 PROVIDE 12 WATER QUALITY CHOICE SET INCLUDING SEGMENT SPECIFIC ECOSYSTEM SERVICES IN RANDOM ORDER WHERE ESS = REG OR PRO OR CUL

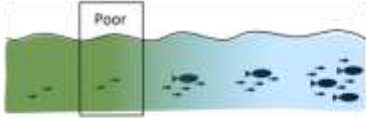

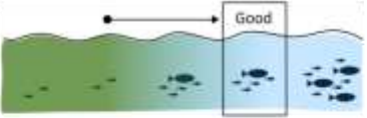

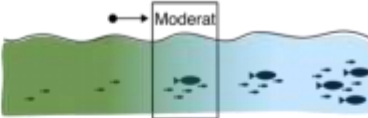

Please choose your preferred alternative among the following three.

Note that the policy initiative in alternative A and B will only result in a water quality improvement in that specific area.
